

Eclat Materials

The image shows two fabric samples. On the left, there is a roll of light blue fabric with a fine, woven texture. On the right, there is a larger piece of white fabric with a brown speckled pattern, possibly a knit or a non-woven material. The background is a plain, light-colored surface.

Drylight

Our airy quick dry fabric is the next level of breathability. Its textured-back can whisk sweat and reduce the stickiness of the fabric caused by moisture. Ideal for rapid movement and excessive sweating or a London weather.

Drytrack

Confidence on track. Engineered for speed and to get out of the way. A dual yarn system powers this material. The back whirls up moisture to reduce stickiness caused by sweat. The front spreads it out to speed up drying to stay noticeably fresher.

Drytrack is anti-cling and fast-drying.
Perfect for dynamic movement and excessive sweating.
Or higher and more prestigious track and field.

Primefit Zero

Stretchy like the stretchiest. Zero spandex. This material's fine furrow structure is composed of highly compressed strands of flexuous yarns.

They maximize its stretch capabilities and inhibit the loss of elasticity for a longer life cycle.

Softform

Designed to sink into. A high-performance material with an incredibly refined softness, and a lean process. It's naturally flexible, thanks to its distinct coil-like structure. Season independent and configurable to needs.

The technical achievement of this ultramodern activewear material exists in its very lean and quality assurance development process.

Huddletech

Just like the penguins. Insulation technology precisely designed to make great use of body heat. A unified group of yarns, finishing, and structures allow the material to retain heat. And deliver amazing comfort and performance.

Altogether, the advantage of Eclat Huddletech is its soft and woolly touch. And the adaptable structural design that controls heat buildup between the material and the body, to stay warm longer.

Optimised for running, training & fitness, and hiking.

Woveknit

A firm knit structure made for sports and the day-to-day wear. Our Woveknit fabrics are built to last. They are tough and agile.

One of the key things about this fabric is its comfort, flexibility and breathability. The real competitive edge is its built-in back structure, for air trapping and moisture management. Handy for the colder seasons.
